

Art Quilts & Fiber Collages

In this workshop, you will learn Maggie's fabric collage technique, which focuses on the use of batik fabric to create light and shadow within the subject, and is designed for fiber artists. Spend two days immersing yourself in color & shape. You'll discover that learning to use color & shape in a purposeful way will allow you to control the mood and emotional impact of your work.

We'll use fiber artist's tools in our class work: batik fabric, very sharp scissors, thread & lots of pins. No paint will be used.

SUBJECT MATTER: Students will be working on a pet, flower, or still life.

These are fun no-stress images that allow you to delve into the collage technique as well as allowing for color and shading practice.

PLEASE EMAIL ME FOR PRE-APPROVAL OF THE PHOTO OR DESIGN YOU WISH TO USE.

Note***

There is guided pre-work on how to prepare your image using photo manipulation software and how to resize and print your image.
